

TECHNICAL SKILLS:

Web & Mobile Development

PHP, Laravel, Node.js, Express.js, React.js, React Native, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Blade, CodeIgniter, WordPress

Databases & Backend

MySQL, PostgreSQL, MongoDB, SQLite, RESTful APIs, API Integration, JWT/Sanctum Authentication, Middleware, Webhooks, Database Design, Migrations, Query Optimization

DevOps, Hosting & Infrastructure

Git, GitHub, Linux/Bash, cPanel, DNS, SSL, SMTP Servers, Server Deployment, System Diagnostics

Development Tools & Engineering

Postman, NPM, Composer, Software Development Lifecycle (SDLC), Agile/Scrum, Testing, Debugging, Secure Coding, System Architecture, Payment Integration

PROFESSIONAL EXPERIENCE:

EXWHYZEE TECHNOLOGIES

Full-Stack Developer | November 2025 – Present

Designed, built, and maintained scalable full-stack web applications using React.js, Node.js, Express, and PostgreSQL, delivering secure RESTful APIs, optimized databases, production-ready features, and end-to-end deployment support in collaborative Git workflows.

BLUEPAGE SOFTWARE LTD

Software Engineering Intern | 2025

Developed robust backend features and RESTful APIs using PHP, Laravel, and MySQL, seamlessly integrating frontend components, managing database migrations, troubleshooting bugs, and collaborating via Git-based workflows.

RUSMA DIGITAL LINKS

CEO, Founder & Lead Software Engineer | 2025 – Present

Led the end-to-end design, development, and delivery of custom web, mobile, and proprietary CMS products using PHP, Laravel, React Native, and MySQL, while managing Linux/cPanel infrastructure, DNS, SSL, SMTP, and automated deployment workflows.

NOTABLE PROJECTS:

Ahioma — Multi-Tenant Restaurant & Food SaaS

Technologies: Node.js, Express.js, React.js, PostgreSQL

- Developed a feature-rich SaaS platform for restaurants and food businesses.
- Implemented multi-tenant architecture supporting independent business accounts.
- Built modules for restaurant operations, food management, orders, customers, and business administration.
- Developed reusable dashboards and workflows to support different business requirements.

Skolentra — School Management SaaS with AI Features

Technologies: Laravel, PHP, JavaScript, Tailwind CSS, MySQL, REST APIs

- Developed a multi-tenant school management SaaS supporting administrators, teachers, students, parents, staff, finance, library, registration, and examination roles.
- Implemented AI-powered features, online CBT examinations, exam/CA timetables, and term-by-term result generation.
- Built multi-currency support for **NGN, USD, and INR**, with online and offline payment recording.
- Developed role-based ID cards and result templates with multiple customizable designs.

[OnTrack.ng](#) — Business Management & POS Platform

Technologies: Laravel, PHP, MySQL, REST APIs

- Contributed to the development of a business management and Point-of-Sale platform supporting business operations, sales, inventory, and related workflows.
- Developed backend functionality and API services for reliable communication between application components and the central database.
- Worked on transaction-related functionality and database-driven business processes.

[Billing.ng](#) — VTU & Utility Payment Platform

Technologies: Laravel, PHP, React Native, MySQL, REST APIs

- Developed features for a digital payment platform supporting airtime, data, cable TV, electricity, Exam Pin, Jamb and Digital Café Services.
- Integrated third-party service APIs for automated transaction processing.
- Implemented wallet, transaction, and payment-related backend functionality.
- Developed supporting mobile application functionality using React Native.

[Magajin Wilbafos](#) — Digital Publishing & Audiobook Platform

Technologies: Laravel, React Native, MySQL, REST APIs, Firebase

- Developed a web and mobile platform for digital literature and audiobook distribution.
- Built a standalone virtual currency system that users purchase and use to access paid audio content.
- Integrated payment processing, wallet/currency transactions, and access control for premium content.
- Implemented real-time mobile notifications using Firebase Cloud Messaging (FCM).

EDUCATION AND CERTIFICATION:

Nasarawa State University, Keffi

Bachelor of Science (B.Sc.) in Computer Science 2019 – 2024

[Freecodecamp.org](#)

Certification in Responsive Web Design 2024

PROFESSIONAL STRENGTHS

- Full-Stack Web Application Development
- Backend & API Development
- Web & Mobile Application Development
- Database Design & Optimization
- Third-Party API Integration
- Payment & Transaction System Integration
- CMS & Business Software Development
- Server Deployment & Maintenance
- Linux & Web Hosting Administration
- Software Debugging & Technical Support
- System Architecture & Development
- Git & Version Control
